

SUNRISE SHOES PEDORTHICS ORTHOTICS & PROSTHETICS

Sole Secret

The Secret behind SUNRISE Qi's revolutionary performance lies deep in its sole. It is the only shoe equipped with a combination of hard-working components* that deliver dynamic cushioning, balance, stability and energy return throughout the walking cycle.

BOUNCE

The **ROCKER BOTTOM SOLE** and **DYNAMIC ENERGY RETURN STRIP (1)** work together to continuously store and release energy as you walk, giving you that special bounce in your step (much like the feeling when you first learned to hop, skip and jump).

PROTECTION

HEEL CUSHIONING (4) provides indispensable protection for your heel that would otherwise be subjected to pressure equivalent to nearly thrice your body weight in a single step.

STABILITY

MEDIAL and LATERAL STABILIZERS (3) give you an even landing and the right balance of pressure across your foot. These two components guide your feet and prevent excessive inward or outward rolling when you walk.

BALANCE

TWIN TRACKS (2) configuration puts you on sure-footing. Other shoes have soles that are ever so slightly convex (so it would seem that you were standing on a single track as though on ice-skates). SUNRISE FootWoRx stands squarely on twin tracks throughout the bottom of the sole, planting you securely on the ground every time you stand.

**patent pending*

	Width	Size
Women	B, D	6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 12
	B, D, 2E, 4E	5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 12
Men	D, 2E, 4E	8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12, 13, 14, 15
